Project Management Ethics and
Training and Certification

Beverly Horton Cummings, PMP

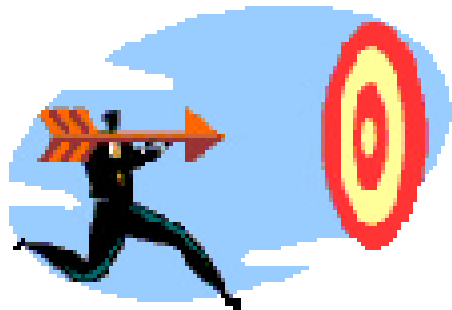

Ethics

- It's right to spend more time adding more quality to your work but it is also right to meet deadlines and avoid “diminishing returns” on your efforts.

Ethics

- It's right to be concerned about short-term results, but it is also right to focus on long term goals.

Ethics

- It's right not to share information given to you in confidence, but it is also right to report violations of ethical standards.

Ethics

- Be honest and realistic in reporting project

- Quality

- Cost

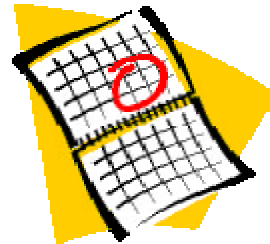

- Time

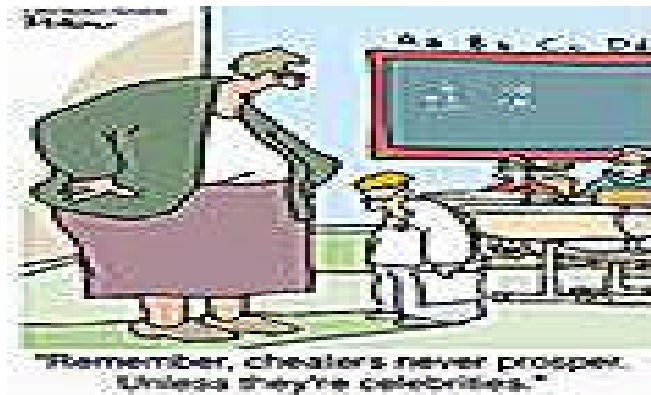

Ethics

- Clear, complete and accurate status reports
 - Schedule
 - Milestones
 - Risk
 - Issues

Ethics
